

Seasoned Reservoir Geologist

Job Description

Avasthi & Associates, Inc., Worldwide Energy Consulting Company, is seeking a highly motivated, results oriented Seasoned Reservoir Geologist to support our clients' acquisitions project teams.

- Be a lead player in an acquisitions project team that includes disciplines such as production geology, reservoir engineering, production engineering, and well engineering.
- Lead geo-subsurface teams in conducting studies pertaining to all aspects of CO2 flooding, including petrophysical engineering, production geology, and economics.
- Staff mentoring in areas of geo-subsurface technology.
- Be a lead expert in reservoir characterization for the group.

Job Requirements

Experience

- 15+ years of experience in the oil & gas industry, much of it gained in an operating environment.

Skills

- Ability to work with multi-disciplinary teams to influence and deliver appropriate technical advice and solutions.
- Ability to explore and apply lateral thinking/innovative approaches to problems.
- All around skills and experience required, from geo-subsurface technical skills to operations, with a clear understanding of business drivers. Ability to run commercial geological and economic software packages to evaluate various development scenarios.
- Excellent communicator with the team, operations and other groups.
- Able to work in a fast paced environment, frequently under pressure on multiple tasks.
- Well developed interpersonal and presentation skills.

Education - Bachelor's Degree in Geology or equivalent required. Advanced degree preferred.

Position Type - Contract

Location - Houston, TX
