

## STAFF ACQUISITIONS ENGINEER

### Job Description

Avasthi & Associates, Inc., Worldwide Petroleum Consulting, is seeking a highly motivated, results oriented Staff Acquisitions Engineer to support our clients' acquisitions teams in purchasing additional assets.

The successful candidate will be responsible for the following:

- Be a lead player in an acquisition team that includes disciplines such as reservoir engineering, production geology, production technology, reserve engineering, and economic analysis.
- Lead geo-subsurface teams in conducting studies pertaining to all aspects of CO2 flooding, including petrophysical engineering, production geology, reservoir engineering, and economics.
- Staff mentoring in areas of subsurface technology.
- Be a lead expert in evaluating reservoir assets for the group.

### Job Requirements

#### Experience

10-20+ years of experience in the oil & gas industry, much of it gained in an operating environment.

#### Skills

- Ability to work with multi-disciplinary teams to influence and deliver appropriate technical advice and solutions.
- Ability to explore and apply lateral thinking/innovative approaches to problems.
- All around skills and experience required, from sub-surface technical skills to operations, with a clear understanding of business drivers. Ability to run commercial economic packages to evaluate various development scenarios.
- Excellent communicator with the team, operations and other groups.
- Able to work in a fast paced environment, frequently under pressure on multiple tasks.
- Well developed interpersonal and presentation skills.
