

Request a Proposal

How to get a tailored technical and commercial proposal from A&A

Tell us about your project, and our reservoir engineering and simulation/modeling, geoscience/geomodeling, EOR/IOR, drilling and well engineering/modeling, and energy-transition specialists will prepare a tailored technical and commercial proposal — whether you're issuing a formal RFP/RFQ or exploring a scope of work with us directly.

135+ Expert Consultants **36+** Years in Petroleum Consulting **30+** Countries Served

How to Request a Proposal

1. Submit Your Request

Send your project scope, RFQ/RFP documents, and desired timeline to us by email:

contact@AvasthiConsulting.com

2. Scope Review

A senior consultant reviews your requirements and follows up with any clarifying questions, typically within 2–3 business days.

3. Tailored Proposal

You receive a written technical and commercial proposal, generally within 5–10 business days depending on complexity.

4. Discuss & Award

We're available for a call or meeting or a video conference to walk through our approach and answer questions before you decide.

What to Include in Your Request

What to Send Us

- Company name, contact & role
- Area of interest / service line
- Project scope, objectives & background

Helpful to Include

- RFP/RFQ documents (PDF, Word, or Excel)
- RFQ reference number, if applicable
- Desired timeline & proposal deadline

Confidentiality

All submissions are treated as strictly confidential. We're glad to execute an NDA before reviewing sensitive technical, reserves, or commercial data — just mention this in your request and we'll send one over promptly. There is no obligation until a signed agreement is in place.
